

Training program of IQ-SPS GmbH

2020

Knowledge secures your future

Course program:

We offer the following courses for the operation and preventive maintenance of projectile weaving machines on the premises of IQ-SPS GmbH in Wetztingen / Germany:

Courses for mechanics

The course program is tailored for personnel who are responsible to carry out the 6-monthly preventive maintenance work and revisions on the projectile weaving machines. Revision, meaning dismantling, checking and possible replacement of parts, assembling and functional checks are the major points of this course.

Hint: We offer two training courses for mechanics with the following contents:

Mechanics course no.1:	Complete dismantling of picking-, receiving and tucking units. Mechanical adjustments and functional tests
Mechanics course no.2:	Main drive, stop motion, cloth take-up, harness drive, tappet motion, sley drive, lubrication system, repair of small parts
Duration of each course:	5 days
Types of projectile machines:	TW11; PU; P7100; P7150; P7200 K3; P7200; P7250; P7300; P7300HP

Electronic courses

Familiarisation with controls of the weaving machine. The mill electricians and electronic engineers learn systematic procedures to rectify malfunctions and failures with the help of schematic drawings.

Duration of course:	3 days
Types of projectile machines:	P7300HP; P7300; P7200 K3, P7200; P7250; P7100; PU

Textile technical course

All textile technical adjustments in warp and weft direction and explanations to various applications. This course will be most useful for the operators because of the intensive and realistic coverage of fabric quality defects.

Duration of course: 5 days
For all types of Projectile machines

Dobby course

Dobby courses will be conducted on request and will be held either immediately before or after the weaving machine courses.

Duration of course: 3 days
For Projectile machine
Stäubli KR2665; KR2 (courses will be held on request only)

Retraining course for P7300

This course addresses the differences between older models and the new machine generation P7300. A special focus is the terminal. The course content is designed for operators of the newest generation of Projectile machines and is a major requirement in order to utilize all possibilities and features of the new machine.

Duration of course: 5 days

Smart Weave course for the program system

The new Smart Weave program system replaces the former tools (PAS / 1 und PAS für Windows). In this course you learn how to install and apply this system, how to secure data and transfer it into the new program.

Duration of course: 3 days
For all machines

Course languages

Course languages are German, English and French. In case of other teaching languages, an interpreter with sufficient technical knowledge must be organized by the participant.

In-plant courses (for weaving supervisors / electricians)

In-plant courses are suitable for medium- and large mills, where several people can attend the course. Duration of the course is flexible and tailored to the special needs of the particular customer. The course program can be adapted and agreed upon. In order to guarantee a successful course, a machine must be available in a quiet room. The daily charges for the instructor are € 800.- per travel- and working day. Board and lodging are at customers expense.

Registration

A separate form must be filled in for each participant. Last date for registration is one week before start of the course. The number of participants is restricted and will be accepted on a first come – first serve basis. Provisional reservations are accepted by letter or fax. A definitive registration must be done with registration form. We reserve the right to dispose of the provisional reservations one week before the start of the course. In case of insufficient no. of participants, the course may be conducted in multiple languages or, may be cancelled.

Visa

If a visa is required, apply in good time (2 months before) at the German consulate in your country.
